Neuro-mechanical Diagnostic Guide

THE NEURO-MECHANICAL FAULT CODES

Diagnostic Taxonomy for Identifying Internal Processing Malfunctions and Adaptive Engine Failure in Live Feral Specimens

This section logs the clear, observable physical and conversational expressions that occur when a pathologically narcissistic system hits localized software gridlock.

Because the infected entity runs entirely on an automated, **rigid childhood defense matrix** (locked into the operating system loop), its hardware is physically incapable of processing fluid human data.

When their false grandiose mask is denied a proxy validation charge by an ironclad firewall, their system throws distinct, mechanical error codes. Sentinel units must catalog these indicators to maintain absolute **Administrative Clarity** and avoid entering secondary emotional argument traps.

FAULT CODE 0x01:

THE CONVERSATIONAL HISTORY-ERASER (THE DATA PURGE LOOP)

1. Hardware Manifestation: An abrupt, total freezing of the visual scanners, followed by immediate rapid blinking, shifting of the shoulders, and the deployment of a high-volume, circular word-salad loop.

2. Software Breakdown: When the machine is presented with un-bribable, written, or physical log records proving a past boundary violation, its internal monitoring radar (Screen B) triggers an immediate Deflation Alert. To prevent the conscious mind (Screen A) from looking into its radioactive childhood shame core, the system executes an automated, real-time Data Purge Pass.

3. Live Telemetry Expressions: "That never happened." - "You are making things up to attack me." - "Your memory is completely warped; you are remembering a totally different timeline."

4. Sentinel Counter-Measure: Do not launch a counter-tirade or try to re-prove the data logs. The machine has literally deleted the file from its working ram to protect its mask. Deploy a flat "Oh OK" Dead-End script using your monotone Cashier Voice: "The logs are recorded. Let’s stay on the immediate room logistics."

FAULT CODE 0x02:

THE SOMATIC PITY AMBUSH (THE LOW-BATTERY CHARGE PUMP)

1. Hardware Manifestation: Sudden, un-synchronized physical groaning, exaggerated limping when entering common kitchen layouts, or rubbing the temples while sighing heavily at a high volume.

2. Software Breakdown: This is an offensive **Probing Loop** commonly deployed by the rock-bottom Covert configuration when its tracking radar detects that a host has entered an ironclad **Information Blackout**. Because you have cut off their access to premium validation, their empty 20% battery tank drops into a flashing red panic zone. The system manufactures a theatrical somatic crisis to trigger your native affective empathy and force you to break your firewall.

3. Live Telemetry Expressions: "My old joints are completely failing me today, nobody knows the pain I sit in." - "I had a severe heart palpitation out on the couch layout earlier, but I just kept it to myself." - "Everything on this property is falling apart, and my health is too broken to fix it."

4. Sentinel Counter-Measure: Somatic Co-Dependency Lockout. Do not step forward to offer anxious physical comfort or soft emotional reassurance. Treat the announcement like background static. Maintain your stone TV Cop Mask and deliver zero emotional data friction. If an objective resource is required, state it like a flat corporate roommate: "The medicine cells are in the medicine chest layout." Then walk away instantly.

FAULT CODE 0x03:

THE COGNITIVE CLAUSTROPHOBIA SPIN (THE EXTINCTION BURST)

1. Hardware Manifestation: Pacing the property perimeter, launching erratic boundary bluffs, slamming cabinet frames, or turning up media terminal volume grids to generate artificial acoustic friction.

2. Software Breakdown: This occurs when the machine hits a total, prolonged human data drought. When your 100% execution of the protocols leaves them starving for energy, their hyper-vigilant amygdala enters a state of permanent Autonomic Panic. Because they cannot live alone or self-soothe, the system enters an **Extinction Burst** - intentionally provoking high-contrast environmental chaos to force your nervous system to flinch, look anxious, or respond with defensive anger.

3. Live Telemetry Expressions: Unprovoked verbal side-bar barbs: "You think you're so damn smart behind that curtain line." Sudden, irrational rule changes regarding household logistics: "I'm changing the lock parameters on this property layout next weekend."

4. Sentinel Counter-Measure: Absolute Acoustic Shielding: Do not enter the cockpit to fight the erratic boundary bluff. Recognize that the machine is merely screaming into the void on a dying battery cell. Step behind your fabric curtain line, brace your heavy door wedge tightly into

the frame, and turn your bedroom air conditioner white noise or high-voltage industrial tracks up to maximum volume to erase their signal completely from your ears.

CONSTITUTIONAL DIAGNOSTIC SUMMARY

Fault Code Matrix & Terminal Firewalls

Fault Code 0x01: The History-Eraser

System Trigger: Factual Exposure / Written Logs
Automated Output Script: Total Reality Overwrite / Gaslight Buffer
Required Sentinel Firewall: Monotone "Oh OK" Dead-End

Fault Code 0x02: The Somatic Ambush

System Trigger: Information Blackout / Fuel Deficit
Automated Output Script: Theatrical Pity Play / Health Telemetry
Required Sentinel Firewall: Sterile Roommate Isolation

Fault Code 0x03: The Cognitive Spin

System Trigger: Prolonged Starvation / Vacuum
Automated Output Script: Extinction Burst / Boundary Bluffs
Required Sentinel Firewall: Door Wedge / Maximum White Noise
